Education

Thakur College of Engineering and Technology 2023 – 2027
Bachelor of Engineering in Information Technology **CGPA: 8.94/10**
Higher Secondary (12th) 65.67%
Secondary (10th) 91.20%

Technical Skills

Programming Languages: C++, JavaScript, SQL, Python (Basic)
Frontend Development: React.js, Tailwind CSS, Bootstrap, HTML5, CSS3, Responsive Web Design
Backend Development: Node.js, Express.js, FastAPI, RESTful APIs, API Integration
Databases: MongoDB, MongoDB Atlas, SQL
AI Integration: Groq API, Large Language Model (LLM) API Integration, PDF Text Extraction
Developer Tools: Git, GitHub, Postman, Power BI, VS Code, Vercel, Render, Netlify
Core Computer Science: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks, Software Engineering

Projects

FlavorFusion – Restaurant Management System | *MERN Stack* | Live Demo | GitHub 2026

- Designed and developed a component-based, responsive user interface using React.js and Tailwind CSS, with reusable modules for food ordering, table booking, and dynamic menu management.
- Developed RESTful APIs using Node.js and Express.js for order processing, table bookings, and menu operations; integrated MongoDB Atlas for persistent cloud data storage.
- Implemented dish search, category-based filtering, vegetarian/non-vegetarian selection, and price-range filtering to improve menu discovery and usability.
- Built a rule-based chatbot using keyword matching to identify food preferences and queries, retrieve menu items from MongoDB, and recommend items by category, rating, and price. Deployed the frontend on Vercel and backend on Render, with API integration and responsive layouts for mobile, tablet, and desktop.

Portfolio AI – AI-Powered Personal Portfolio Assistant |*Python, FastAPI, React.js, Groq API*|Live Demo|GitHub 2026

- Designed and developed a resume-based AI portfolio assistant to provide personalized information about technical skills, education, projects, experience, and achievements.
- Integrated the Groq LLM API with a FastAPI backend, using extracted resume content, predefined profile information, and custom instructions to generate relevant responses to user queries.
- Implemented PDF text extraction and connected the React.js chatbot interface to the backend through API requests, enabling users to interact with profile information conversationally.
- Built a responsive chat interface and deployed the frontend on Vercel and backend on Render, configuring environment variables, REST API communication, and CORS for cross-origin access.

AnimesVerse – Anime Discovery Platform | *React.js, Tailwind CSS, REST API* | Live Demo | GitHub 2025

- Designed and deployed an anime discovery platform featuring **1,000+ anime titles**, enabling users to explore trending content and access detailed anime information through a centralized interface.
- Engineered reusable **React.js** components with **Tailwind CSS**, implementing **3 core discovery features**—anime search, genre-based filtering, and type-based filtering—across responsive desktop and mobile layouts.
- Integrated **REST APIs** with asynchronous data fetching and React state management to dynamically retrieve anime listings, trending content, and title details while synchronizing data with UI updates.
- Deployed the application on **Vercel** and maintained source code on **GitHub**, establishing a publicly accessible platform with a version-controlled frontend build and deployment workflow.

Experience

Web Development Intern Remote
Oasis Infobyte *Jan 2026 – Feb 2026*

- Developed a responsive landing page and a real-time temperature converter using HTML5, CSS3, and JavaScript, applying frontend development and responsive design principles.
- Used Git for version control and GitHub to manage project code, following an organized development workflow and maintaining readable, structured code.

Achievements

Solved **900+ Data Structures and Algorithms problems** across competitive programming platforms, including LeetCode, GeeksforGeeks, and CodeChef, strengthening algorithmic thinking and problem-solving skills.

Achieved a maximum **2-Star CodeChef rating** and participated in competitive programming contests.

Qualified for the **Final Round of TCET Shastra Competitive Programming Contest (SCPC) 2026** as Team Lead after advancing through Round 1.

Participated in coding, aptitude, quiz, and technical competitions through platforms such as Unstop, demonstrating continuous learning and problem-solving.
